Good food – all the way ...

Temptainer Basic is the new generation of high-quality, stainless steel food containers from Hallins. The aim is the same as before – to create the absolute best conditions for preserving the essence of good food, all the way from your kitchen to the table. The right temperature, low energy consumption and the right design for perfect hygiene and a healthy working environment are of utmost importance.

Just like earlier models in the Temptainer family, the food trolleys are made completely of stainless steel for the best conceivable hygiene, durability and service life. They have the same great features, performance and functionality as the previous generation. Temptainer Basic is available in several versions of the Single, Tower and Twin models, with a combination of hot, cold and neutral spaces.

Temptainer Basic is the result of a development project and truly lives up to Hallins' motto for sound food transport: *Hot food must be served hot, cold food must be served cold, and all food must be handled hygienically. And it should be fun to do so. Temptainer preserves the quality of the food and promotes the love of food associated with cooking, serving and enjoying a delicious meal.*

... from kitchen to table with Temptainer Basic

Low energy consumption

Our excellent insulation, at least 40 mm polyurethan foam, allows you to lower your energy consumption.

Constant Temperature Retention

Our technology in combination with the insulation gives you an even temperature inside the box.

Climate Smart

Long life cycle and recycable.

Hot, Cold or Neutral

Temptainer Basic is available with single or double compartments, with combinations of active heating, active cooling or neutral storage.

STAIN-
LESS

100% Stainless

The inner and outer cabinets have a robust design able to withstand all cleaning agents.

Hygienic

Fully welded inner cabinet, easy to clean.

Easy to Transport

The undercarriage has large, easy rolling castors with ball bearing.

Temptainer Basic quickly attains the right operating temperature and offers superior heat retention and cooling. The heating and cooling modules at the back of the box are easily accessible during replacement or servicing.

We proudly present the Temptainer Basic family

With hot, cold and neutral compartments for effective and secure food transportation.

All models can be equipped with central brakes. Single and Tower can also be fitted with vertical steering handles for even easier manoeuvring.

Single

Single design trolley in four versions: neutral, convection heating, compressor cooling and Peltier cooling.

Tower

Trolley with two stacked compartments. Comes in several combinations with convection heating, compressor cooling, Peltier cooling or neutral storage. A compact solution for transporting both hot and cold food or as a flexible complement to the Single model.

Twin

Trolley with double compartments, side by side. Comes in several combinations with convection heating, compressor cooling, Peltier cooling or neutral storage. Large capacity for transporting hot and cold food.
